To Whom this May Concern,

This concerns not only all of Montana but those who love to visit for our Wild Places. Please leave things sacred and unspoiled, this is and never will be sustainable. To restore this landscape, remove the logging roads, not the trees!

The DEIS does not disclose the specific locations of the timber sales that will cut down trees to fill 60,000 log trucks over the next 15 years. Once those specifics become known, the public will have no NEPA process to review the estimated impacts of those timber sales. The courts have already ruled this violates NEPA!
