Comments: Mid-Swan Project

Dear people of the Flathead National Forest's

As a regular visitor of the Flathead region I will call attention to the Mid-Swan Landscape Restoration Project.

The Project is an arrogant attempt to dominate the natural landscape with taxpayer subsidized make-work projects. The DEIS claims that 85% of the area needs logging or other forms of human manipulation, including 36,000 acres of designated and recommended Wilderness where natural processes are by law supposed to unfold on their own without mechanical intrusions.

Best regards
