Comments: Please OPPOSE the Midas Gold mining proposal.

I oppose the Midas Gold Stibnite Mine proposed project. The mining operation will drastically change the environment for centuries to come. Many mining companies have had false promises of being "good" for the environment and "benefit" local communities. This is NEVER the case. The Midas Gold company is a Canadian company and will reap MAJORITY of the benefits, next to NIL for the local community/ United States. Also, their proposed holding ponds for tailings, building a MILE LONG tunnel for the streams, building a road in a ROADLESS forest. NONE ARE beneficial for the environment. Aquatic and Terrestrial organisms are the losers in this mining plan. In addition, recreation in the area, as well as local residents in/near Yellow Pine will suffer. Lost access to areas, Greater traffic from large mining equipment, and many other impacts. The USFS has NOT done due diligence in listening/considering public comment and NEED to be considered.

Thank you for your time.
