Comments: Please allow e-bikes on trails.

I raced mountain bikes for Years.. E bikes allow me to ride again after many injuries and age. I am grateful this technology has given me the ability to ride again. People need to be considerate no matter how they enjoy trails. Children, elderly, dogs share the trail. Signs showing the horse, hiker and bike yield rules help. Some people are just not aware. I was pushed off trails by inconsiderate fast bikers many times. Ebiking does not contribute to this problem, people who feel entitled do. Say hello when you approach someone. Give them a chance to move off trail. They want out of the way just as much as overtaking person does.

Fast bikers are on the trails already. Ebikes allow more of us to enjoy the beauty of Tahoe. I can no longer hike due to my injuries. I love the mountains. The mountains belong to all of us. The shutdown and ignorant people left trash, human waste and vandalism. This is a bigger problem than those of us who cherish nature.

Please allow ebikes.
