Title:

Comments: Dear Sirs, I often raft and fish in the Salmon River drainage, spending money in the local economies. The Steelhead and Salmon of the Salmon River need all the help they can get. This project stands to diminish prime spawning habitat of a listed species, for the small profit of a foreign owned company. You do not need to look far to see the dismal track record of mining. This has the potential to become a super fund clean up site, paid for by the American tax payer, when the company leaves town under the cover of darkness. Therefore I ask you to chose Alternative 5, The No Action Alternative! Do the right thing for the fish and environment!

Sincerely, Jeffrey Bright
