Comments: I am in favor of allowing pedal assist ebikes on public lands. I have friends in their 70's and one in his 80's who are avid mountain bikers but with age, it becomes more difficult to enjoy the trails they once rode. Now that they have switched to ebikes they are able to enjoy mountain biking again. Expanding these trails to ebikes will provide great pleasure to ride on these great trails. This endorsement is for pedal assist bikes ONLY. If the bike has a throttle, these bikes should not be on the same trails as mountain bikes.
