Title:

Comments: I am a 60 years old male, that have been surfing since 12 yo and riding mountain bikes since 1980. I started riding in the San Francisco bay area and Marin County and have ridden in various areas in the country. Now I have scoliosis and a herniated disk and can no longer surf, but I can still ride my e-MTB class 1 (power assist with max speed of 20mph). Regardless of my personal limitations, I have observed that e-MTB do not cause any damage to the trails. Its speed is limited and require the individual to pedal in order for the motor to assist.

Also e-MTB's allow for people with disabilities or limitations to be able to enjoy the trails and outdoors
