Title:

Comments: As a secondary educator teaching Science and an individual who values their environment & societal value, I am writing the Forest Service to create a Supplemental Draft Environmental Impact Statement for the relative agencies & public to review & have the opportunity to comment. I would like to specifically comment on my concern about the incomplete & unavailable information that not only impedes the public's ability, but also the Service's ability to evaluate significant adverse impacts like excess in copper toxicity, impact on fish species, improper functionality of the MicroDrain liner/leak configuration proposed under Alternative 2 & lastly questionable mitigation plan for trucking cyanide in and along the area. I would like to also request an extension of comment period to the full 120 days to the full 120 days due to COVID, lack of inclusion & account for citizens experiencing life events especially those with students in school & lastly lack of equitable accessibility to printed documents. Thank you for your hard work and reading this comment that is a necessity of action in extension of the comment period to 120 days. Please confirm receipt of this message. Respectfully, Mary Brossman
