Comments: Thank you for accepting comments on this matter.

Please do not allow E-Bikes of any kind on USFS trails.

These trails are the last place on Earth where we can go hiking and get away from Cars, Bikes, and E-Bikes.

I hike trails all over Colorado and my favorites are the ones where you do not let Mountain Bikes or E-Bikes, both of them do serious harm and erosion to trails. The erosion I see on the Indian Creek trail south east of Strontia Springs Dam near Waterton is one example... What happens is the trail starts to resemble a half-pipe (A cruved surface, that is horrible to walk or hike on) it is also very difficult to maintain. E-Bikes are not allowed back there, but I have seen them. We need places to walk, trek and climb free of Motors and Electronic mechanisms please continue to prohibit and E-Bikes from all USFS lands/trails and wilderness areas.

Thanks for caring

Joe O
