Title:

Comments: Class 1 and Class 2 ebikes should 100% be treated as a standard pedal bike... With the 20 mile-an-hour restrictions it is no different then riding a regular bike... It will actually spread out the bike riders more on the trails making them safer too....

The national forest is for everyone and some people cannot enjoy it because of age or injury or physical condition... This would allow them the same rights and access to those trails.
