Title:

Comments: 1. Thank you (USFS) for clearly defining all three classes of e-bikes as motorized.

2. Thank you (USFS) for managing all e-bike use under the 2005 Travel Management Rule, including performing NEPA analysis for any non-motorized trails designated for e-bike use in the future.

3. E-bikes are here to stay and they are a wonderful resource, but are truly motorized with an electric motor and do not belong in designated Wilderness. We have so many current threats to Wilderness, and it is simple to adhere to the Wilderness Act's intent and letter of the law on this one!
