Title:

Comments: this mine is obscene for requesting to dump 4 to 5 millions tons of tailing, pollution on this virgin land. they should be quickly denied this permit. no way should this permit be issued for this profiteer destroyer of our national land. this is national land, why should we allow this self interested profiteers to destroy this land like this putting all that money in his back pocket and he leaves us with devastated land. that land is home to trees and wildlife the trees make oxygen to keep us alive that is very important gift to us. to let this scum destroy the trees. no way is this a good deal for every american. 330,000,000 americans own this land. this is not alaska land, this is national land and our nation needs that land to serve all 330,000,000 of us, we all need to save every tree we can. letting all this beautiful land in alaska be destroyed by this scum profiteers is outrageous. absolutely obscene and outrageous. he has land he is using. that is enough. if he wants more make sure he cleans up every inch he has destroyed so far. that is what these obscene mine owners do. they destroy a plot and then move on leaving pollution and destruction in their wake. this is outrageous. stop this permit right now. this comment is for the public record please receipt. jean poublee
