Title:

Comments: I am 68 and an avid cyclist. I also ride motorcycles. E-bikes are motorized vehicles and should always be designated as such. There are very powerful electric off road motorcycles being built. How are you going to separate them from e-bikes. I understand the thoughts that opening trails to e-bikes will give access to more people. It will also increase the impact on these trails. It will increase the number of unskilled riders going into remote and advanced skill type trails. I wouldn't mind e-bikes on roads but I would not like to see them allowed on single track trails.
