Comments: Class 1 EBikes should be allowed in all trails where regular mountain bike is allowed. I ride both regular bikes and class 1 ebike and I can say that the eBike added more fun in my riding experience. I can now explore more trails and gone those days that I skip riding because of leg sore caused by the regular bike. Also, my 10 year Son is now having more fun at the trails because I use the ebike to tow him up the hill and we have more time at the trail together. With regards to the environmental impact, I don't think the Class 1 ebike has negative impact to the trails and natural habitat, the weight of it is almost similar to those heavy regular bikes that I always see at the trails so I don't think they caused soil erosions more than those heavy regular bikes. With it comes to noise pollution, I don't think it does cause any disturbances because it's not loud.
