Comments: I would like to speak for the allowance of class 1 eBikes into USFS land and single track trails as well. Due to my age and existing long term health issues the additional of a battery to my bike is of great help with hill climbing when I am riding my bike. It makes me want to go out and exercise more than I normally would if I did not have the addition to my bike. I was recently in Switzerland and was very surprised to see that almost all bikes were eBikes and were ridden by young and old.

Thanks for your time,

John
