Last name: Clayton

Organization:

Title:

Comments: Please, do NOT open this area for logging. This forest supports an incredibly rich multitude of places, resources, species, and peoples that can not simply be ignored by capitalistic desperation. We cannot let money and resource hunger destroy the beautiful forests and habitats of the Tongass. This land is not land for the United States government to decide the future of without the input of Native Alaskans, the stewards of the land from time immemorial.
