Comments: Choose Alternative 5, the No Action Alternative, to prevent the large-scale destruction of habitat and immense risks posed by the Stibnite Gold Project. All action alternatives in the DEIS would harm ESA listed chinook salmon, steelhead, and bull trout, and threaten the irreplaceable recreation resources downstream.

Read that statement out loud. Why would we ever let a mining interest destroy the environment, make money, declare bankruptcy, and then leave the tax payers to clean it all up after they have raped & pillaged the land, sky,& water?

Gold mine on the headwaters of the headwaters? Really? That is never a good idea for anyone or anything downstream on any river!
