Comments: I recently moved to Sonoita and am extremely dismayed to learn about the future plans of mining in this area and it's impact on our unique environment here. I am opposed to any further development Of mining in the nearby environs that will affect our water supply, our natural habitats, and increase the likelihood of vehicular accidents on the two lane roads connecting the mines to Tucson by allowing numerous large trucks to transport materials daily . My husband and I first discovered the Sonoita Elgin area during a cycling trip with the Race Across America cycling camp and have finally fulfilled a lifelong dream of moving to this area. But now we are very concerned that the roads will be Extremely dangerous to cycle on if large trucks are allowed to transport materials multiple times per day on Rtes 82 and 83 with only two lanes and no shoulder.! Dangerous for cars too! So we are both adamantly against allowing this proposal to be approved !
