Comments: I respectfully request that you do not label e-bikes as motor vehicles. I ride a Class 2 - pedal assisted e-bike. It is not self propelled and required skill and strength to use this bike on single track mountain bike trails. Making these motor vehicles contributes to the misunderstanding that these bikes do not belong on single track mt bike trails. As an older rider, I now need the pedal assist to get up steep hills and have the ability to ride several days in a row. I have no problem with limiting forest trails to class 1 only to keep the speed of the riders similar.
