First name: Lauri

Last name: Patrick

Organization:

Title:

Comments: Ebike should not be allowed on national parks, and forest service trails that are designated for non-motorized trails. No bike with a throttle should be allowed on non motorized trails. How can one be distinguished by the other? The lines are being blurred and should remain 2 distinguished and different trail systems.

There are ebikes that are very little difference from a motorcycle. The damage motorcycles make on a trail can make a trail unrideable and difficult to hike.

(Kelly trail system).
