Comments: In regard to E-bikes being used on USFS land; as an avid mountainbiker and hunter who regularly uses the national forest for recreating I support the use of Class 1 E-bikes on trails intended for mountain bikes. I do NOT support the use of ebikes that have a throttle, only those that are pedal assist below 20MPH. The wear on the trail with a class 1 e-bike would be comparable to that of a traditional mountain bike.
