Comments: To whom it may concern,

I object to "Hecla Greens Creek Mining Company proposing to extend the existing dry-stack tailings disposal facility and incorporate waste rock co-disposal techniques in a northward direction for additional tailings and waste rock storage capacity" without obtaining express permission from Angoon.

I don't see any good faith government-to-government effort happening here. Angoon should have the authority to decide whether it wants to be annexed, and the annex should not happen without Angoon's full and explicit consent.

Thank you for your time.
