Comments: An 56yo, an 8yr Army Veteran, I have had 3 major heart attacks in 04, 05, and 06 which resulted in 60% of my heart scar tissue. I live on my pacemaker. In 2011 I quit riding bikes cause the push up small hills would cause my heart to pump out of sync and cause my diffibrulator to go off. I recently purchased a class 2 fat tire ebike for winter/snow and beach/sand. I also purchased a class 3 for summer riding in the mountains. I will admit I purchaced prior to researching e classes, Getting out with electric assist has not only helped my get my body back onto some sort of shape it has gotten me off the couch. It has improved my mental status, i am not sunk as deep in depression. My grandfather owned WRW Logging Inc till the 90s. I grew up in the back woods of Washington. My ebike allows my to get back into outdoors without disturbing it. Class 1,2, and 3 ebikes should be allowed on NFS trails, roads, and anywhere analog bikes are allowed. Thank you.
