Title:

Comments: I have enjoyed mountain biking for much of my life. In recent years I have been challenged by several medical conditions that affect many seniors my age. I've found in the past 12 months that using a pedal assist type e-bike has allowed me to once again participate with my healthier family and friends in an outdoor sport I love. After a phone call to a local Bureau of Land Management office I was pleased to find that e-bike use was allowed on a nearby bike trail system that we had enjoyed in previous years. I sincerely hope that the USDA Forest Service would also adopt the necessary management directives to allow e-bike use on their trail systems.
