Comments: 1. This is to request that the Forest Service extend the 60 day public comment period on the DEIS for Stibnite Mine to 120 days. The DEIS and supporting documents, not to mention other agency's pertinent documents, amount to several thousand pages. It is unreasonable to expect reviewers to be able to review this large volume, in such a short timeframe, and be able to comment in an informed manner, consistent with the intent of the National Environmental Policy Act. Thank you.

2. This is to request a printed copy of the DEIS for Stibnite Mine. On-line access only is less convenient that paper document access in several important resspects. Consistent with the intent of the National Environmental Policy Act, and NEPA Regulations, to encourage access and review of environmental documents.
