Title:

Comments: I have been riding a class 1 E-bike for approximately eight months. I have been mountain biking for approximately 20 years and an equestrian for over 60 years. There is no environmental or safety reason to disallow the use of class 1E bikes on any trail that already allows bikes. The use of these bikes will keep me healthier and more active for longer. The NFS should change its rules forbidding class 1 ebikes on any trail presently open to conventional bikes as soon as possible to be in line with other agency recreational regulations.
