Comments: Hello.

I'm a long time user of many types of public lands, and I spend lots of time utilizing Nat Forests for mountain biking. I believe that there should be a very clear line drawn as to where electric bikes are permitted vs where they are not, and that this should be well-communicated and enforced.

Electric bikes have motors. Their use should be permitted only on the same trails as other motorized vehicles. If a motorcycle/dirt-bike is not allowed on a trail, neither should an e-bike.

Pretty straight-forward in my opinion.

Thanks,

Anderson Shepard
