Comments: I am fully supportive of the usage of e-bikes but you need to make your definition in FSM 7700 be the same as NPS regulations...they define a e-bike as "fully operable pedals and an electric motor of not more than 750 watts." YOu define one as"fully operable pedals and an electric motor of less than 750 watts." You need to change your wording to "not more than." Industry standards offer 750 w, one HP e-bikes. There are few below that. If you want use of these on the Forest then this wording change is a must.
