Title:

Comments: I am a resident of Boise Idaho and have lived in Idaho on-and-off for 16 of the past 32 years. I have a M.S. in Geology and worked as an Exploration Geologist during my 35 year career in 6 western states, with first hand experience with 'grass roots' exploration projects. I have reviewed the supporting material for the Stibnite Project, and have recently visited the project site while on a camping trip in Central Idaho. I whole heartedly support the Stibnite Gold Project, and view it as a win-win scenario for both Midas Gold Corp as well as the people of the State of Idaho. The project's benefits speak for itself, as partly summarized on the other side of this letter. Midas Gold Corp should be commended for their minimal impact (less than 20 acres disturbance) during the Exploration Phase, and for their willingness to deal with legacy environmental issues that will remain if the project is not approved.
