Comments: I am in favor of allowing all Class I E-bikes on all the trails that are currently open to mountain bikes. I am also in favor of allowing Class II and III E-bikes on trails that are currently allowed for motorized vehicles in the National Forest areas. These changes are crucial to increasing the accessibility of the outdoors to people from all walks of life. By preventing E-bikes on these trails, the ableist and ageist rules and regulations continue to prevent people from enjoying the great outdoors. I ask that you please change the rules to allow for older folks and the differentially-abled to enjoy the great outdoors via electronically assisted mountain bikes if they choose to do so. Thanks!
