Comments: I believe that ebikes should continue to be considered motor vehicles

On forest service land. Having ridden them before, they are great fun! However they have a much greater impact on trails causing more work to maintain

Many trail systems. As someone who will probably

purchase an E-bike in the next 10 years, I do not plan to ride any trails that are for non motorized vehicles. There are plenty of other places (atv and motocross trails) on forest service land where ebikes should happily go.
