Comments: Hello. I have been following some of the press on e-bikes in the US Forests. I wanted to let you know that I am an e-bike user and it has changed my life. I have had a variety of health issues and not able to ride a regular bike for long periods or uphill. That is changing as I am becoming more fit on my e-bike everyday. I am wanting to write to plea that we do not remove or restrict e-bike for the forest. Without my e-bike I would not be able to enjoy the beautiful nature. I see elderly people on e bikes and I am sure they would not be on there if they did not have it. I think there should be guidelines on how to ride your e-bike with respect and safety. My e-bike offers me an additional push but it is not a motorized bike.

Please take into consideration those that struggle with health and want to enjoy the nature, have fun and fill alive.

Thank you for all you do
