Title:

Comments: I am writing to support the acceptance of e bikes on mountain bike trails. It's not just the disabled that e bikes are a game changer for. As a 53 year old woman who only recently started learning the sport of mountain biking (and love it) I am looking into getting an e bike because it will enable me to ride with my husband and keep up with him much better. He's much taller and rides a bike two sizes larger than mine, plus he is more fit. I have health issues that are not technically disabilities but limit my stamina and I am really looking forward to being able to ride together again.

Thank you very much!
