Title:

Comments: I strongly oppose e-bikes on our public lands where non-motorized travel is allowed. I have been an avid cyclist both on and off road for the last 35 years. My personal experience has been very negative including being nearly run over by e-bikes multiple times, increased damage to trails and disturbing lack of respect for the environment and cycling etiquette. It is vitally important that we maintain non-motorized areas to enjoy the beauty of our public lands.
