Comments: If you've ever done trail maintenance, you'd understand why folks are so strongly opposed to e-bike usage on trails. They tear up the trails, destroy the solitude that is the primary reason for their heavy usage and disrupt the wildlife in their habitat. As an analogy, imagine the neighbors creating a trail through your bedroom (or your kitchen, or your bathroom, etc), open 24/7! We have plenty of opportunities for e-bike usage without creating havoc in our natural world and wildlife habitats. And we've already bullied our way into the natural environments far too much, with our highways and our strip malls and our industries and ... It's far past time to end our intrusions into what's left of the natural world!
