Comments: Hello,

I am an avid mountain biker, so I understand why people want more access to trails. However, I also think that E-bikes are much more destructive to the environment around the trails, and the trails themselves, than a normal mountain bike. They erode trails faster, scare wildlife, and are more hazardous and dangerous to other trail users because of the increased speed. I think there is plenty of space on existing motorized trails for their use, so I don't think there is a need for allowing E-bikes on non-motorized trails. This would only pave the way to allowing all forms of motorized vehicles on trails, and degrade the areas more than they already are.

In conclusion, I am strongly opposed to allowing E-bikes on non-motorized trails. They have no place on them, and should only be allowed on motorized trails due to the above problems.
