Comments: Ebikes have been an amazing new gift to this world for me. I suffered a major injury to my hip a few years ago. I had multiple surgeries and I still have much pain. I can no longer hike, play sports, go for walks or ride normal bikes. The assistance that an ebike gives me enables me to get outside and enjoy life. If it were not for my ebike then I wouldn't have much activity in my life as many other activities cause me days of suffering afterwards. Ebikes have saved my life and my mental health. I am only 31 years old and I was severely injured at the age of 27. I'm too young to call it quits on life. The ebike has been a great too for my recovery.
