Comments: I support the use of Class-1 pedal assist bikes for all current mountain bike trails administered by the forest service. I do not support Class-2 and 3 for trails currently for non motorized only. I am 71 years old and the class -1 bike allows me to ride some of the trails I used to ride. The speed that I now ride is no faster than when I was young without e-assist. please take users like me into account in your decision making.
