Comments: I supports the USFS adopting a standard definition for an e-bike separate from a traditional mountain bike.

I supports the USFS adopting a three three-tiered classification for e-bikes (Class 1, 2, and 3).

I supports giving local Forest Service districts the authority to decide whether and where e-bikes should be allowed beyond trails that are currently open to motorized use, as long as access is not lost or impeded for traditional mountain bikes.

Only Class 1 e-bikes should be considered for use on trails that are currently designated non-motorized.
