Last name: karcich

Organization: Private Properties LLC

Title:

Comments: Where to start? E bikes are motorized vehicles and as such should not be allowed in the back country. A large number of those users will most definitely violate path designations and trespass onto wilderness sensitive meadows and fields, scare wildlife and do destruction to our pristine forests. Not to mention be on top of hikers, people on horses and others trying to enjoy the peacefulness of the forest. This is a bad choice and I believe it should be scrapped!!!
