Title:

Comments: Dear USDA Forest Service, the Bureau of Land Management, and the National Park Service,

Please do not allow e bikes on federal lands. I have almost been mown down by Mountain bikers using only human power while hiking. I cannot imagine trying to dodge e bikes going at speed. In addictions, the erosion caused by mountain bike trails is significant and will become worse with e bikes. E bikes will also increase the incursion of humans into wildlife habitat. Our wildlife is already at risk due to human incursions. They do not need more.

Respectfully,

Jann Johnson
