Title:

Comments: e-Bikes are, by definition motorized vehicles that should not be permitted on backcountry trails. Mountain bikes in general can be damaging to trails not built specifically for their use and maintained as such. I don't support the use of mountain bikes or e-bikes on backcountry trails intended for hiking. Gravel roads, fire roads, railroad right-of-way trails, and other access roads and purpose-built bike-specific trails appropriate for motorized vehicle use are also appropriate for mountain bike and e-bike use.
