Title:

Comments: I vehemently oppose the use of E-bikes in our national forests. As an elderly walker, I am sick and tired of jumping off the trail to avoid being seriously injured by cyclists who have no consideration for others. Joy riding at high speeds. I feel that my, and others like me, would suffer from reduced access to our national forest and the enjoyment from walking, bird watching and just having a quiet picnic, if you make access easier for E-bikes. And, I don't see that it is necessary to carve out new trails for that population to the further destruction of the forests themselves and wild habitat.
