Comments: I recognize the great fun E-bikes hold for people. However, like other machines, they should NOT be allowed in wilderness areas. Nor should they be allowed on hiking only trails. I have had several very close calls with mountain bikes on hiking trails. I believe if any of these encounters had been E-bikes, I could have been seriously injured. I feel wildlife is more at risk with E-bikes as well.

Keep E-bikes and mountain bikes on trails that specifically allow them.
