Title:

Comments: Good afternoon.

I am writing to oppose the Forest Service's proposed rule to open up my National Forest lands to e-bike use.

Let's leave E-bikes in the cities, where they belong. They're a great mode of transport, but not in National Parks or Forest lands. Let's face it, they are motorized vehicles, plain & simple.

Our national parks are under enough pressure already. Introducing more motorized vehicles is not wise.

thank you for your attention.
