First name: Susan

Last name: Gemmill

Organization:

Title:

Comments: We hike for the beauty and the quiet. Both are intensely restorative to the human psyche, something desperately needed at this time. There is no honestly good reason to add ebikes into the equation in fact, they can be downright dangerous in the best of circumstances (say, a flat paved city road). Therefore, I oppose allowing motorized vehicles of any kind, including ebikes, onto well-established hiking trails.
