Comments:

Please withdraw the proposal to open up more trails in our National Forests to electric bikes. I didn't move to Colorado to watch people bike. I'm here to see wild animals who are afraid of e-bikes, which are now being developed to drive up to 55 mph.

I can't outrun a motorized bike when someone wants to terrorize hikers. The FBI arrested a man in my town for having 3 pipe bombs. Please don't add this new terror to destroy peaceful hiking and rare glimpses of the wild animals I love.
