Comments: E-Bikes are motorized vehicles and do NOT BELONG on foot paths or trails in our wilderness areas! Mountain bikers have run me off the trail already and are very dangerous to hikers and to wildlife. E-bikes are even more dangerous! Please leave the wilderness wild- no one needs to be on an E-bike on rocky uneven, winding and root-penetrated wilderness trails. This mode of transit was designed for flat, even terrain. Accidents are bound to occur and result in injury and even rescue efforts. They are unsuited and unsafe for wilderness trails.
