Comments: I am opposed to any form of motorized or for that matter non-motorized vehicles in Federally controlled land. Whether that land is National Forest, National Parks, BLM or any other administered lands. These lands are not just for the enjoyment of people but are also being set aside for the protection of the plants and animals that reside in these areas. Another motorized intrusion is not what these areas need or can handle. We, the government, have already allowed too many exceptions for motorized vehicles to operate in wilderness. It is time to pause and take a hard look at the consequences of these actions. Please keep my opinion in mind when voting on any new rules.
