Comments: E-bikes use a motor to move the bike forward, and with technological advancements soon to come, they will be able to reach speeds up to 55 mph. There is no reason that such a motorized vehicle should be allowed on non-motorized trails. The speed of the bikes is dangerous to hikers on these trails, and most importantly, it is detrimental to wildlife and vegetation. E-bikes would startle and disturb animals and cause damage to these forests and deserts that we are trying to protect. Even regular mountain bikes are too disruptive for these trails, as again, they travel at high speeds and cause too much wear and tear on the trail. I respectfully request that you withdraw this proposal.
